

# Fabric Expansion Joints

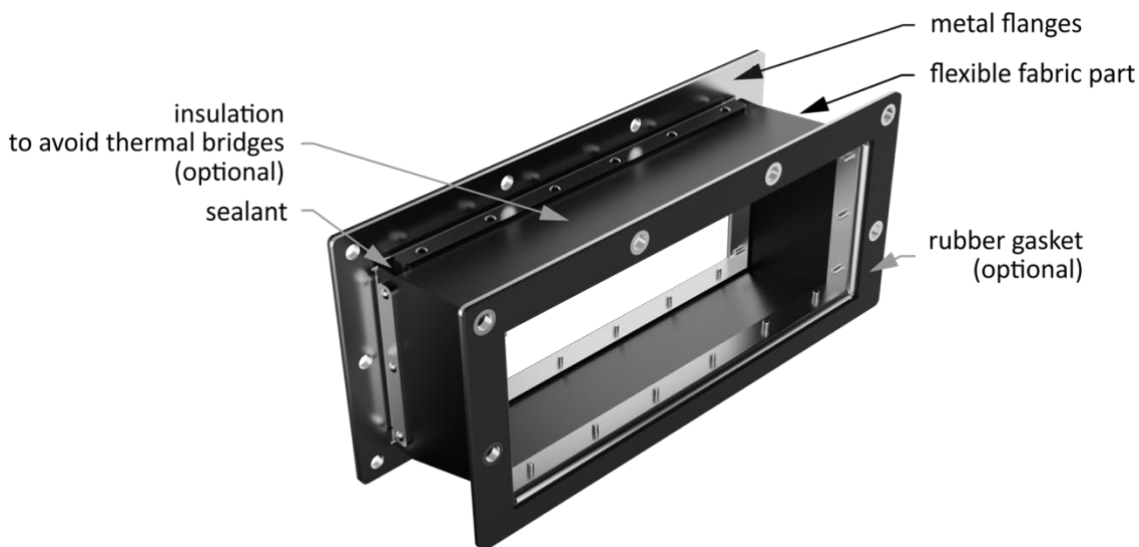

**DESCRIPTION OF THE PRODUCT:**

Fabric expansion joints (compensators) are very durable and suitable for outdoor environments. They are part of the vehicle's exterior HVAC ducting system, compensate for tolerances, and eliminate noise. They are connected with sealed stainless steel or aluminum flanges equipped with gaskets.

**COMPOSITION:**

The geometry is customizable.

**PROPERTIES:**

- |              |                               |
|--------------|-------------------------------|
| Very durable | Fire resistant                |
| UV resistant | Ozone resistant               |
| Waterproof   | Outdoor temperature resistant |

**FIRE PROTECTION CLASSES:**

- EN 45545-2 R1/HL2
- EN 45545-2 R1/HL3
- NFPA 130
