

# Textile Air Duct Hoses

<b>Description:</b>	Lightweight flexible textile air hoses with an internal steel spring spiral. Suitable as interior supply or exhaust ducting in HVAC systems. Perfectly maintains the internal cross-section when bending. Available in both round and other cross-sectional shapes, and offered in insulated and non-insulated versions. The product is certified and complies with EN 45545-2 R1/HL3. These hoses are provided complete with all necessary fixations.
<b>Variants:</b>	Non-insulated / insulated variant available
<b>Composition:</b>	2x FR white neoprene glass fabric + inner copper coated steel wire
<b>Colour:</b>	Light grey

<b>Properties:</b>	<ul style="list-style-type: none"> <li>Maintains the internal cross-section</li> <li>Flexible</li> <li>Lightweight</li> <li>Fire resistant</li> <li>Antistatic</li> <li>Impermeable</li> <li>Durable</li> </ul>
--------------------	---

<b>Application Medium:</b>	Non-corrosive medium temperature gasses
<b>Pressure Res. Min/Max:</b>	7000 mmWS/mmWG to +2.5 bar
<b>Inside Diameter Min/Max:</b>	10 mm to 400 mm
<b>Length Min/Max:</b>	100 mm to 40 000 mm
<b>Fire resistance:</b>	HL 3 according to EN 45545-2 for R1 material
<b>Temperature resistance:</b>	- 50 to + 150 °C
